Project Name	Smart Agriculture
Maximum marks	4 marks

Proposed Solution

S.no	Parameter	Description
1	Problem Statement (Problem to be solved)	Farmers face challenges such as inefficient irrigation, unpredictable weather, crop diseases, pest attacks, and lack of real-time farm monitoring.
2	Idea / Solution Description	Develop an AI and IoT-based Smart Agriculture System that uses soil moisture, temperature, and humidity sensors to monitor field conditions
3	Novelty / Uniqueness	The solution improves farmers' income by increasing crop yield and reducing water, fertilizer, and pesticide usage.
4	Social Impact / Customer Satisfaction	The solution combines IoT sensors, Artificial Intelligence, weather forecasting, and mobile technology into a single platform.
5	Business Model (Revenue Model)	Revenue will be generated through subscription plans for premium services, sales of IoT sensor kits, partnerships with agricultural .
6	Scalability of the Solution	The system can be expanded from individual farms to villages, districts, and entire states.
