Test Summary Report – Smart Agriculture AI/ML System

1. Purpose of the Document

The purpose of this document is to summarize the testing activities, defect status, and test coverage of the **Smart Agriculture AI/ML System** before its release for **User Acceptance Testing (UAT)**. It provides an overview of resolved issues, testing progress, and overall software quality to ensure the application is ready for end-user validation.

2. Defect Analysis

This report summarizes the number of defects resolved at each severity level during the testing phase.

Resolution	Severity 1 (Critical)	Severity 2 (High)	Severity 3 (Medium)	Severity 4 (Low)	Total
By Design	2	2	1	2	7
Duplicate	0	1	1	0	2
External (API/Data Source)	1	1	1	0	3
Fixed	6	7	8	10	31
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	2
Won't Fix	0	1	1	2	4
Total	9	12	14	15	50

3. Test Case Analysis

This report shows the execution status of all test cases.

Module	Total Cases	Not Tested	Fail	Pass
User Registration & Login	8	0	0	8
Dashboard & Weather Forecast	10	0	0	10
Soil Analysis	8	0	0	8
AI Crop Recommendation	9	0	1	8
Crop Disease Detection	10	0	0	10
Fertilizer Recommendation	6	0	0	6
Notifications & Alerts	5	0	0	5
Reports & Analytics	4	0	0	4
Database & Security	5	0	0	5
Total	65	0	1	64

4. Open Issues

Issue ID	Description	Severity	Status
SI-001	AI crop recommendation accuracy needs improvement for uncommon crops	Medium	Under Review
SI-002	Weather API response may be delayed during peak traffic	Low	Monitoring

5. Conclusion

The **Smart Agriculture AI/ML System** has successfully completed functional and performance testing. The application demonstrates stable performance in user registration, soil analysis, crop recommendation, disease detection, weather forecasting, fertilizer suggestions, notifications, and reporting. The system is considered **ready for User Acceptance Testing (UAT)** with only minor non-critical issues remaining.
